JOURNAL OF MOLECULAR CATALYSIS VOL. 55 No. 1 - 3 NOV. 1, 1989

CONTENTS

EDITORIAL xi

On the mechanism of the selective oxidation of C_4 linear hydrocarbons to maleic anhydride: an FT–IR study of the adsorption and oxidation of 1,3-butadiene on vanadia–titania 1
G. Busca, G. Ramis and V. Lorenzelli (Genoa, Italy)

Infrared spectroscopic studies of ethylene hydroformylation on Rh/SiO_2: an investigation of the relationships between homogeneous and heterogeneous hydroformylation 12
S. S. C. Chuang and Shyh-Ing Pien (Akron, OH, U.S.A.)

The nature of surface chromium species on CrO_x/ZrO_2 catalysts 23
A. Cimino, D. Cordischi, S. Febbraro, D. Gazzoli, V. Indovina, M. Occhiuzzi, M. Valigi (Rome, Italy), F. Boccuzzi, A. Chiorino and G. Ghiotti (Turin, Italy)

Surface reactions of alkanes and organometallic chemistry applied to the study of pure and bimetallic catalysts 34
B. Coq, A. Bittar, T. Tazi and F. Figueras (Montpellier, France)

Surface properties of ZnO-based catalysts and related mechanistic features of the higher alcohol synthesis by FT–IR spectroscopy and TPSR 43
L. Lietti, E. Tronconi, P. Forzatti (Milan, Italy) and G. Busca (Genoa, Italy)

Support and additive effects on the state of rhodium catalysts 55
L. Kraus, M. I. Zaki, H. Knözinger (Munich, F.R.G.) and B. Tesche (West Berlin, F.R.G.)

A model of selective energy transfer at the active site of the catalyst 70
R. Larsson (Lund, Sweden)

Study of the effect of Pr and Ho ions on Pd/SiO_2 properties using catalysts prepared via supported organometallic complexes 84
Yu. N. Nogin, E. A. Paukshtis, A. V. Pashis and Yu. A. Ryndin (Novosibirsk, U.S.S.R.)

Iron stearate-based organometallic catalysts supported on iron and nickel hydroxides 94
N. F. Noskova, A. R. Broadskii, S. R. Savel'ev and A. I. Kazimova (Alma-Ata, U.S.S.R.)

Interaction of acetylene with Si and Ge(100) surfaces: a theoretical study 101
M. Toscano and N. Russo (Cosenza, Italy)

Supported metallic catalysts obtained by anchoring metal complexes on carbon supports 109
Yu. A. Ryndin, O. S. Alekseev, P. A. Simonov and V. A. Likholobov (Novosibirsk, U.S.S.R.)

IR and UV–vis spectroscopic studies of the stable $Mo{=}CH_2$ carbene complexes over photoreduced silica–molybdena catalysts with chemisorbed cyclopropane, and their role in olefin metathesis reactions. 126
K. A. Vikulov, I. V. Elev, B. N. Shelimov and V. B. Kazansky (Moscow, U.S.S.R.)

Peculiarities of CO activation on ultra-dispersed Co catalysts obtained via thermal decomposition of surface carbonyl Co complexes 146
V. L. Kuznetsov, M. N. Aleksandrov and L. N. Bulgakova (Novosibirsk, U.S.S.R.)

Spectroscopic evidence for a surface Nb carbene in a new SiO_2-attached Nb catalyst active for propene metathesis. 159
K. Asakura, M. Nishimura and Y. Iwasawa (Tokyo, Japan)

© Elsevier Sequoia/Printed in The Netherlands

Selective hydrogenation of heavy polyunsaturated molecules on copper–chromium catalysts 170
R. Hubaut, J. P. Bonnelle (Villeneuve D'Ascq, France) and M. Daage (Annandale, NJ, U.S.A.)

Cooperative effects of H^+ and H^- hydridocarbonyl ruthenium derivatives; role of homogeneous and heterogeneous protonic and Lewis acids in catalytic hydrocarbonylation reactions 184
G. Braca, A.-M. Raspolli Galletti, G. Sbrana (Pisa, Italy) and E. Trabuco (Rio Preto, SP, Brazil)

Catalytic behaviour of $[Cu(en_2)]^{2+}$ sorbed on zirconium molybdate in the decomposition of hydrogen peroxide 199
U. Chudasama and A. Shivanekar (Baroda, India)

Synthesis of potential hybrid catalysts upon coordination of 'bare' palladium(II) with crosslinked macromolecular nitriles: catalytic dimerization of methyl acrylate 209
B. Corain, S. Rancan, M. Zecca, S. Lora and G. Palma (Padua, Italy)

Heterogenized metal complex catalysts based on Pd black. 220
A. B. Fasman and N. V. Perkas (Alma-Ata, U.S.S.R.)

Group 8 and 9 metal carbonyls as catalysts for 1,5-cyclooctadiene isomerization. . . 229
J. Kaspar, M. Graziani (Trieste, Italy), A. Trovarelli and G. Dolcetti (Udine, Italy)

Homogeneous ruthenium catalysis of *N*-alkylation of amides and lactams. 241
G. Jenner (Strasbourg, France)

Palladium hydrogenation catalysts supported on ion-exchange resins. 247
K. Jerabek (Suchdol, Czechoslovakia)

Preparation and catalytic activity of rhodium and platinum complexes attached to polyamides having a pyridine moiety. 256
Z. M. Michalska, B. Ostaszewski and J. Zientarska (Łódz, Poland)

Oxidation of cyclohexane with H_2O_2 and chlorotetratolylporphyrinatochromium-(III) as catalysts 268
J. Haber, R. Iwanejko and T. Młodnicka (Cracow, Poland)

Oxidative reactivity of $(NEt_4)[Mo^{V}O(SR)_4]$ complexes: catalytic oxidation of benzoin by proton and electron transfer 276
A. Nakamura, N. Ueyama, T.-A. Okamura, H. Zaima and N. Yoshinaga (Osaka, Japan)

Catalytic dehydration of aliphatic alcohol under homogeneous and heterogeneous conditions 285
P. A. Obraztsov and V. S. Malinsky (Moscow, U.S.S.R.)

Dehydration mechanism of ethanol in the pseudoliquid phase of $H_{3-x}Cs_xPW_{12}O_{40}$ 293
T. Okuhara, T. Aria, T. Ichiki, Kwan Young Lee and M. Misono (Tokyo, Japan)

Comparative analysis of homogeneous and immobilized catalysts for ethylene dimerization based on nickel(II) chelates 302
I. E. Uflyand (Rostov-on-Don, U.S.S.R.) and A. D. Pomogailo (Chernogolovka, U.S.S.R.)

Dehydrogenation of ethanol and hydration of ethylene to acetaldehyde on a molten KCl–CuCl eutectic supported on inorganic oxides. An example of a gas–liquid chromatographic catalytic system and a comparison with the behaviour of supported $(\eta^5\text{-}C_5H_5)NiOs_3(\mu\text{-}H)_2(\mu\text{-}CuPPh_3)(CO)_9$. 311
M. Castiglioni, F. Castagno, R. Giordano and E. Sappa (Turin, Italy)

Kinetics and mechanism of the gas-phase oxidation of 1-butene to butanone over a new heterogenized surface vanadate Wacker catalyst 320
E. van der Heide, J. A. M. Ammerlaan, A. W. Gerritsen and J. J. F. Scholten (Delft, The Netherlands)

Metal complexes in inorganic matrices.
Part III. Catalytic activity of $Rh(CO)Cl(PR_3)_2$ heterogenised by the sol–gel method . 330
U. Schubert, C. Egger, K. Rose and C. Alt (Würzburg, F.R.G.)

Butadiene oligomerization and telomerization catalyzed by transition metal complexes supported on organic polymers 340
U. Schuchardt, E. N. Dos Santos and F. Santos Dias (Campinas, Brazil)

Catalytic behaviour of interlayer-supported palladium(II) complexes on lithium hectorite 353
S. Shimazu, T. Ishida and T. Uematsu (Chiba, Japan)

Alcohol synthesis from syngas over cobalt catalysts prepared from $Co_2(CO)_8$ 361
K. Takeuchi, T. Matsuzaki, T.-A. Hanaoka, H. Arakawa, Y. Sugi (Ibaraki, Japan) and Kemei Wei (Fujian, China)

Heterogenized phosphorus(V)–molybdenum(VI) mixed oxo derivatives as bimetallic catalysts for cyclohexene liquid-phase epoxidation 371
E. Tempesti (Monteluco di Roio, Italy), L. Giuffrè, C. Mazzocchia, P. Gronchi (Milan, Italy) and F. Direnzo (Montpellier, France)

Catalysis of Cu^{II}– and Co^{II}–polyvinylpyridine complexes in the oxidation of 3,5-di-t-butylcatechol 379
A. Miyagi, S. Nishiyama, S. Tsuruya and M. Masai (Kobe, Japan)

Hydrogenation of unsaturated and nitro compounds on polymer-supported palladium(0) chelates 391
I. E. Uflyand, V. N. Sheinker (Rostov-on-Don, U.S.S.R.), A. V. Bulatov and A. D. Pomogailo (Chernogolovka, U.S.S.R.)

The role of resin–amine transition metal complexes in hydrogen peroxide decomposition 396
M. Y. El-Sheikh, A. M. Habib, F. M. Ashmawy, A. H. Gemeay and A. B. Zaki (Tanta, Egypt)

The study of the composition and catalytic properties of palladium(II) complexes with poly(vinylpyridine) 406
A. K. Zharmagambetova, V. A. Golodov and Yu. P. Saltykov (Alma-Ata, U.S.S.R.)

Formation of 2,6-dimethylaniline from 2,6-dimethylphenol with catalysts obtained via anchoring colloidal palladium compounds on carbon supports 415
V. A. Semikolenov, M. E. Boldyreva, Yu. V. Shmidt and A. G. Stepanov (Novosibirsk, U.S.S.R.)

Heterogenization of homogeneous catalysts by chelate formation with macroligands 429
A. D. Pomogailo (Chernogolovka, U.S.S.R.) and I. E. Uflyand (Rostov-on-Don, U.S.S.R.)
